## TOSHIBA – THE INVENTOR OF FLASH MEMORY

In 1984, Toshiba developed a new type of semiconductor memory called flash memory, leading the industry into the next generation ahead of its competitors.

Some time later in 1987, NAND flash memory was developed, and this has since been used in a variety of memory cards and electronic equipments. The NAND flash market has grown rapidly, with flash memory becoming an internationally standardized memory device. Toshiba, the inventor of flash memory, has carved out a path to a new era in which we are all able to carry videos, music and data with us wherever we go.

| History of Flash Memory | |
|---|---|
| 1984 | Developed NOR-type Flash Memory |
| 1987 | Developed NAND-type Flash Memory |
| Jul. 2000 | Released SD™ Memory Card |
| Jun. 2003 | Released miniSD™ Memory Card |
| Dec. 2003 | Released USB Flash Memory |
| Jul. 2006 | Released microSD™ Memory Card |
| Oct. 2006 | Released SDHC™ Memory Card |
| May. 2010 | Released SDXC™ Memory Card |
